16280 23 Mile Road

**Plant 3 - Assembly and Inspection**  
16931 Enterprise Drive

# Visitor Safety Guidelines

We hope that you have an enjoyable and safe visit with us. To help ensure your safety while in our facility, we ask that you comply with the following rules.

Please observe the following **Personal Protective Equipment (PPE) requirements**:

**Safety Glasses**  
(will be provided)

**Safety Toe Shoes**  
(recommended)

**No Shorts**

**No Open-Toed Shoes**  
(heels not recommended)

Be advised that some areas may have deviating PPE requirements. **Always listen to directions from your tour guide and observe the posted signs.**

## EMERGENCIES, INCLUDING MEDICAL

- If you observe an emergency, please tell your escort and/or dial 911.
- If you hear a plant alarm or siren, listen for directions from your tour guide. Look for posted maps with evacuation routes and shelter-in-place locations. Follow your tour guide to the designated meeting location. Wait in this area for further instructions or an ALL CLEAR signal.

## SECURITY

- Visitor ID badge must be visible at all times.
- Visitors must be accompanied by a Baker Industries representative at all times.
- No one under 12 years old is permitted in shop areas

## ALCOHOL/DRUGS/SMOKING/FIREARMS

- Smoking, alcoholic beverages, and illegal drugs are prohibited on our property at all times.
- Firearms are not permitted in the buildings, but may be stored in your locked vehicle.

## FACILITY TOURS

- Photography, including cell phone and camera use, is prohibited in all manufacturing, assembly, and laboratory areas.
- Walk only in designated aisles .
- Follow all safety warning signs.
- Watch for sharp or hot surfaces.
- Watch for tripping hazards.
- Step aside for moving equipment (ex. forklifts, cranes, etc.). Make eye contact with the operator to ensure that he or she is aware of your presence.
- Please be advised that plant tours involve a significant amount of walking—up to one mile. Visitors with mobility disabilities should contact their Baker Industries representative in advance to ensure safe accommodations can be provided. Unfortunately, visitors with leg casts, crutches, or canes will not be permitted in manufacturing plants (machine and consumable facilities) unless arrangements have been made in advance to provide a wheelchair and tour assistant.

# Foreign Visitors

These guidelines are provided to make your visit to Baker Industries, a Lincoln Electric Company, both productive and pleasant. We also want to ensure we provide a safe and secure environment for you and your information as well as for our people, property, and information. Please assist us in this effort by complying with our security requirements.

## General Principle

All visitors to our facilities will be screened and required to sign an agreement to maintain compliance with the International Traffic in Arms Regulations (ITAR) and export regulations that are administered by the State Department's Directorate of Defense Trade Controls (DDTC). To maintain compliance, we must ensure that controlled technologies or technical data are not inadvertently released to foreign nationals.

### WHAT IS EXPORT-CONTROLLED TECHNOLOGY OR TECHNICAL DATA?

- » "Information...required for the design, development, production, manufacture, assembly, operation, repair, testing, maintenance or modification of defense articles" (22 CFR 120.10 of the International Traffic in Arms Regulations (ITAR)). Note that "defense articles" includes a large portion of aerospace-related work and essentially all space-related work.
- » It does NOT include information concerning "general scientific, mathematical or engineering principles"
- » It does NOT include information already in the public domain, such as that available through unrestricted publications, unlimited distribution at conferences, or libraries
- » It does NOT include fundamental research "where the resulting information is ordinarily published and shared broadly in the scientific community." However, equipment used to produce the fundamental research may nonetheless be controlled.

### TECHNOLOGY IS "RELEASED" WHEN:

- » it is available to foreign nationals for visual inspection (such as reading technical specifications, plans, blueprints, etc.)
- » it is exchanged verbally, including by correspondence;
- » it is made available by practice or application under the guidance of persons with knowledge of the technology.

Visitors refer to any non-Baker Industries employee; common examples include visiting company representatives, students, researchers, or members of the media.

## WILL VISITORS INCLUDE NON-US CITIZENS?

All visitors will be asked to indicate their citizenship before being allowed access to our facilities. This will determine eligibility to participate in tours and other restricted activities. All visitors will be provided color-coded visitor tags so that it's more readily apparent who cannot attend restricted areas or activities.

### ESCORTS

The person in charge of your visit will ensure that non-US visitors are escorted when visiting our facilities and are not given keys/keycards, combinations, passwords, or other access to facilities in which export-controlled work is being performed.

### RESTRICTIONS ON INVOLVEMENT

It may be necessary to restrict non-US visitors from participating in particular activities that would expose them to export-controlled technology or technical data. Please keep in mind that the production floor of Plant 1, all of Plant 2, and all of Plant 4 are generally considered export-controlled areas, meaning that non-US visitors will not be able to participate in tours.
